

Formulas for Unit Conversion Charts - Bob Dahse @
<http://www.GeoPathfinder.net/11.html> rev.05/31/2014

Sorry folks, but if you are looking for the free version of this conversion chart it no longer exists. Since about 10% of the traffic volume on our website involves this PDF we have decided that it needs to help financially support the web hosting costs. The good news is that you can [pay a mere \\$0.99 using PayPal and get a Payloadz download of it](#) for the cost of an app.

After three years of free downloads on this we hope that you still find it just as useful.
